

STEP UP TO A GREENER PULASTIC 2000

Aura have been Australia's leading innovator in sports flooring systems over the last 3 decades.

Always at the forefront of the latest technology, **Aura** continues to strive for clever and new ideas to develop and improve the technology available in Australia. We have our own in-house design engineer.

At **Aura** we believe the installation is just as important as the system. We have our own in-house installation crews so that our same high standard of workmanship is consistent on every single Pulastic installation. The installation of synthetic flooring is a highly specialised field and as such our flooring technicians are expertly trained and are full time sports flooring installers.

Your project is in the best hands possible.

Descol, the manufacturer of Pulastic, are the first company to have applied water based 2 component polyurethane coating products in sports hall applications. This is being talked about as a serious breakthrough in sports flooring technology, for years it was regarded as impossible to make a wear resistant, elastic and mat coating in a 2 component water based urethane. This is especially important for conscientious clients providing Leadership in Energy and Environmental design for sporting venues.

The largest volume of a Pulastic floor is the shock pad. This pad is fabricated out of recycled rubber waste. So **Aura** have already been using recycled material and environmentally aware for more than 30 years!

Key advantages of the Pulastic system at a glance:

- Lifetime Warranty
- Biomechanically Superior
- Optimum sports comfort & injury prevention
- Non glare
- Seamless, non-porous & perfectly even surface
- Extremely strong wear layer
- Optimum sound-dampening capacity
- Simple & cheap to repair
- Maximum impact resistance
- Internationally certified (FIBA approved)
- Building Code of Australia Fire Tested
- Environmentally Friendly
- Optimum balance between grip & slidability
- Good game line definition
- Multifunctional & multipurpose
- Excellent light fastness
- Easy maintenance
- A great variety of colours available
- Maximum load-bearing capacity & tensile strength
- Installation history Australia wide
